

SUMMARY

Motivated student passionate about full-stack development and machine learning, eager to apply analytical and problem-solving skills to create innovative, data-driven applications. Always seeking opportunities to learn, grow, and contribute to impactful projects.

WORK EXPERIENCES

Rangsit International College – Rangsit University

Software Engineer & Teaching Assistant August 2024 – December 2025

- Developed RSU Job Fair System, allowing companies to post jobs and students to apply, improving event management.
- Built RIC Attendance System, where students mark attendance via QR codes with location verification, streamlining tracking.
- Created Alumni Website for alumni to connect, share success stories, and view upcoming events.
- Assisted in planning university activities, ensuring smooth execution and effective teamwork.
- Collaborated on full-stack projects using modern web technologies, gaining experience in front-end/back-end development, databases, and authentication.

Brillar

Python Developer May 2025 – March 2026

- Developed Python backends using the Google Agent Development Kit, OpenAI Agents SDK, and Docling service, building robust and scalable AI-driven solutions.
- Designed and implemented a web crawling service to efficiently extract and process data from multiple sources for internal applications.
- Maintained and optimized backend services, ensuring high performance, reliability, and smooth integration with AI agent frameworks and internal tools.
- Collaborated with cross-functional teams to identify requirements, troubleshoot issues, and deliver effective solutions for complex technical challenges.

EDUCATION

Rangsit University Expected Graduation December 2026
Bachlor of Science in Information and Communication Technology
Yangon Technological University 2019 – 2021

TECHNICAL SKILLS & PROFICIENCIES

- Programming & Development: Python, Java, Web Development, SQL, Unity, Node.js, FastAPI
- Machine Learning & AI: Scikit-learn, TensorFlow, PyTorch, Gen AI
- Frontend & Design Tools: React, Vue.js, HTML/CSS/JS, Canva
- Data Analytics & Reporting: Power BI, RCommander, RapidMiner, Google Analytics
- Version Control & DevOps: Git, GitHub, Docker
- Office & Productivity Tools: Microsoft Office (Word, Excel, PowerPoint), Notion, Slack, Jupyter Notebook, Postman

PROJECTS

Next Thai, Hack the Zodiac Hackathon Finalist

Your AI Assisted Travel Planner

April 2024

- Developed a travel planning project for Thailand as an entry for the Hack the Zodiac, 2024.
- Built an AI travel assistant to help users design personalized trips across Thailand.
- Enabled the assistant to generate downloadable PDF itineraries for users.
- Accepted to compete in the hackathon for the project.

Eco-mart, Hack the Zodiac Hackathon 2nd Runner-up

Your AI Assisted Eco-friendly Shopping Advisor

April 2024

- Developed a shopping advisor as a finalist project for Hack the Zodiac Hackathon 2024.
- Built a system that searches Amazon, Lazada, and other e-commerce platforms to find products.
- Calculated eco-friendliness ratings and recommended the top 5 products based on user preferences and filters.
- Awarded 2nd Runner-Up at the hackathon for innovation and functionality.

SPLASH Golf Club, CIMSO Hospitality ERP Hackathon 1st Place Winner

A Modern System for Golf Clubs

March 2025

- Designed and developed a comprehensive system for a golf club as an entry for the Hospitality ERP Hackathon 2025.
- Implemented a React frontend and JavaScript backend, leveraging MongoDB for efficient data management.
- Integrated an AI-powered chatbot to assist users with booking golf courses.
- Enabled multilingual capabilities and voice interaction for the chatbot, enhancing user experience.
- Secured first place at the Hackathon for innovative design and functionality.

Computer Vision Games

An project for RIC Openhouse

August 2025

- Developed interactive games using camera-based hand gesture detection (Fruit Ninja, drawing, Rock-Paper-Scissors).
- Built with Python, OpenCV, MediaPipe, and Pygame.
- Showcased at RIC Openhouse for demonstration and engagement.

CERTIFICATIONS

- Machine Learning from from: University of Washington on Coursera. Certificate earned at July 9, 2020
- Python for Everybody from University of Michigan on Coursera, Certificate earned at June 10, 2020
- Mathematics for Machine Learning from Imperial College London on Coursera. Certificate earned at November 13, 2020
- Deep Learning by DeepLearning.AI from Coursera. Certificate earned at September 26, 2020
