HTIN LINN

Software Engineer

Burmese | Bangkok, Thailand | +66 65 556 6035 | htinlinn.dev.03@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Software engineer, Python first. I build production backend and AI services: REST and gRPC APIs, MCP servers and LLM integrations, deployed on Kubernetes with CI/CD and automated tests. Currently building the runtime that AI agents run on, in Python, Rust and Go.

Languages: English (IELTS 8.0), Burmese (Native), Thai (Basic), Japanese (JLPT N4)

EXPERIENCE

Software Engineer | *General Magick Industries (MagickMind)* | *Bangkok, Thailand* | *Full-time* | *Apr 2026 - Present*

- **Top committer** since joining on the reasoning, memory and supervisor services. Contributor to Mindroid, the open-source Rust agent runtime.
- Built the agent supervisor: it mints credentials for each agent and runs it as an isolated process that joins workspaces over pub/sub. Added caching to its execution loop, cutting agent turn latency from **4s to 2.5s**.
- Refactored the reasoning service, cutting fast-path latency **40%**. Implemented RLM, Lambda-RLM, Mixture of Judges and MCTS; on GPQA they score **22–34 points** above a direct call with the same model.
- Shipped native tool calling and mid-turn escalation from a fast model to a frontier model across the gateway, reasoning service and supervisor, plus an OpenAI-compatible chat-completions route with tool and image support.

Associate Fullstack Engineer | *Brillar (Atenxion)* | *Singapore (Remote)* | *Full-time* | *May 2025 - Apr 2026*

- Built a **Google ADK** multi-agent platform where teams compose n8n-style workflows from agent and tool nodes, with MCP links to Tricentis, Jira and Airtable, and AI-driven UI widgets.
- Built the CRM integration service (Zoho CRM, SalesIQ, Chatwoot, Zendesk) where agents open tickets and hand off to humans, and **RAG** retrieval over a Crawl4AI crawler and Docling OCR pre-processing.
- Owned two FastAPI services end to end: build and startup time down **30%**, OpenTelemetry and Grafana, pytest in pre-commit hooks.

EARLIER EXPERIENCE

Software Developer Intern | *Rangsit International College* | *Full-time Aug 2024 - May 2025, part-time to Dec 2025*

- Built a QR-based attendance system (Next.js/Express) saving **15 minutes** per class per staff.
- Led Express backend & React frontend for a job fair platform used by **300+ students and 100+ companies**.
- Built a Python/Django course recommendation system used by **100+ students**.

Freelance Software Developer | *Self Employed* | *Myanmar* | *Jan 2021 - Feb 2022*

- Built a Python/Bootstrap online ordering system for a local restaurant that cut average order time by **~3 minutes**, plus Shopee inventory-sync integrations for small businesses.

SKILLS

Programming: Python, TypeScript/JavaScript, Rust, Go, Java, C#, HTML/CSS

Frameworks: FastAPI, Django, Node.js, Express, React, Next.js

AI/ML: LLM APIs, agent runtimes & native tool calling, Google ADK, LangChain, RAG, MCP, Gemini, OCR, Computer Vision (OpenCV, MediaPipe)

Backend & APIs: gRPC/Protobuf, RESTful design, async programming, SQL (PostgreSQL, MySQL), MongoDB, Redis

DevOps & Tools: Docker, Kubernetes, CI/CD (GitHub Actions), Git, Grafana, OpenTelemetry, pytest, Jira, AWS

PROJECTS & ACHIEVEMENTS

- **1st Place**, CIMSO Hospitality ERP Hackathon (Mar 2025) – Built **SPLASH Golf Club** (React + ERP integration) with an AI voice chatbot for bookings.
- **3rd Place, Hack the Zodiac Hackathon (Apr 2024)** – Built NextThai and EcoMart, two AI consumer apps.

EDUCATION

Bachelor of Science (Information and Communication Technology)

Rangsit University | *Pathum Thani, Thailand* | *2022-2025* | ***GPA: 3.96/4*** | ***First Class Honours***

- Mentored classmates and foreign students in programming fundamentals.
