

HTIN LINN

Software Engineer

Burmese | Bangkok, Thailand | +66 65 556 6035 | htinlinn.dev.03@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Software Engineer building the runtime AI agents run on: an agent supervisor, a reasoning service and agent memory, in Rust, Go and Python. Previously shipped production Python microservices and AI/LLM integrations, with a focus on automated testing, CI/CD and reliable API design.

Languages: English (IELTS 8.0), Burmese (Native), Thai (Basic), Japanese (JLPT N4)

EXPERIENCE

Software Engineer | [General Magick Industries \(MagickMind\)](#) | Full-time | Apr 2026 - Present

- Top committer since joining on the reasoning, agent-memory and supervisor services; contributor to Mindroid, the open-source Rust agent runtime.
- Built the agent supervisor running each agent as an isolated, credentialed process, and engineered its execution loop with caching, cutting agent turn latency from 4s to 2.5s.
- Refactored the reasoning service, cutting fast-path latency 40%, and implemented frontier methods (RLM, Lambda-RLM, Mixture of Judges) that lifted benchmark accuracy ~20% over direct LLM calls.
- Shipped native tool calling and mid-turn dual-model escalation across the gateway, reasoning service and supervisor, plus an OpenAI-compatible chat-completions route with tool and image support.

Associate Fullstack Engineer | [Brillar \(Atenxion\)](#) | Singapore (Remote) | May 2025 - Apr 2026

- Owned two Python microservices and built document processing & web crawling pipelines.
- Developed AI-powered services (FastAPI) using RAG, MCP servers, and AI-driven UI widgets.
- Created a shared CRM integration service (Zoho, Chatwoot, Zendesk) used across multiple products.
- Cut container build/startup time by 30% via Docker optimization and added OpenTelemetry + Grafana.
- Maintained pytest suites in CI/CD for stable weekly releases and reviewed microservice integrations.

Software Developer Intern | [Rangsit International College](#) | Thailand | Aug 2024 - Dec 2025 | Part-time from May 2025

- Built a QR-based attendance system (Next.js/Express) saving 15 minutes per class per staff.
- Led Express backend & React frontend for a job fair platform used by 300+ students and 100+ companies.
- Developed a Python/Django course recommendation system adopted by 100+ students.

Freelance Software Developer | Self Employed | Myanmar | Jan 2021 - Feb 2022

- Built a Python/Bootstrap online ordering system for a local restaurant that cut average order time by ~3 minutes, plus Shopee inventory-sync integrations for small businesses.

SKILLS

Programming: Python, Rust, Go, TypeScript/JavaScript, Java, C#, HTML/CSS

Frameworks: FastAPI, Django, Node.js, Express, React, Next.js

AI/ML: LLM APIs, agent runtimes & native tool calling, RAG, MCP, LangChain, OCR, Computer Vision (OpenCV, MediaPipe)

Backend & APIs: gRPC/Protobuf, RESTful design, async programming, PostgreSQL, MySQL, MongoDB, Redis

DevOps & Tools: Docker, Kubernetes, CI/CD (GitHub Actions), Git, Grafana, OpenTelemetry, pytest, Jira, AWS

PROJECTS & ACHIEVEMENTS

- **1st Place**, CIMSO Hospitality ERP Hackathon (Mar 2025) – Built **SPLASH Golf Club** (React + ERP integration) with an AI voice chatbot for bookings.
- **3rd Place**, **Hack the Zodiac Hackathon (Apr 2024)** – Built NextThai and EcoMart, two AI consumer apps.

EDUCATION

Bachelor of Science (Information and Communication Technology)

Rangsit University | Pathum Thani, Thailand | 2022-2025 | GPA: 3.96/4 | First Class Honours

- Mentored classmates and foreign students in programming fundamentals.
