HTIN LINN

Software Engineer

Burmese | Bangkok, Thailand | +66 65 556 6035 | htinlinn.dev.03@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Software engineer shipping production code across backend, frontend, data and ops, in Rust, Go, Python and TypeScript. I build and operate the runtime AI agents run on: an agent supervisor, a reasoning service and agent memory, on Kubernetes with CI/CD, tests and observability. Comfortable in unfamiliar codebases (17 services, four languages), and I write things down so the next team can reuse them.

Languages: English (IELTS 8.0), Burmese (Native), Thai (Basic), Japanese (JLPT N4)

EXPERIENCE

Software Engineer | *General Magick Industries (MagickMind)* | *Indonesia (Remote)* | *Full-time* | *Apr 2026 - Present*

- Built the agent supervisor in Rust: it mints per-agent credentials, runs one isolated process per agent and enforces a **tenant boundary** on every request. Agents join workspaces as participants, so several share a room and every message is attributed.
- Shipped native tool calling and mid-turn escalation from a fast model to a frontier model across the gateway (Go), reasoning service (Python) and runtime (Rust), through an OpenAI-compatible route with request-size caps and host validation on user-supplied URLs.
- Reused and extended building blocks: Mindroid, the company's open-source Rust agent SDK, is the generic runtime and the supervisor the product layer; generic stages and tools go back into the SDK.
- Implemented and benchmarked reasoning strategies (RLM, Lambda-RLM, Mixture of Judges, MCTS): **22–34 points** above a direct call on GPQA with the same model. Cut agent turn latency from **4s to 2.5s** and fast-path latency **40%**.
- **Top committer** since joining on three production services; wrote the case studies and diagrams that explain the runtime to non-engineers.

Associate Fullstack Engineer | *Brillar (Atenxion)* | *Singapore (Remote)* | *Full-time* | *May 2025 - Apr 2026*

- Built a **Google ADK** multi-agent workflow platform, the CRM integration service (Zoho, SalesIQ, Chatwoot, Zendesk) and RAG retrieval over Crawl4AI and Docling.
- Owned two FastAPI services end to end: build and startup time down **30%**, OpenTelemetry and Grafana, pytest in pre-commit hooks.

EARLIER EXPERIENCE

Software Developer Intern | *Rangsit International College* | *Full-time Aug 2024 - May 2025, part-time to Dec 2025*

- Built a QR-based attendance system (Next.js/Express) saving **15 minutes** per class per staff.
- Led Express backend & React frontend for a job fair platform used by **300+ students and 100+ companies**.
- Built a Python/Django course recommendation system used by **100+ students**.

Freelance Software Developer | *Self Employed* | *Myanmar* | *Jan 2021 - Feb 2022*

- Built a Python/Bootstrap restaurant ordering system (order time down **~3 minutes**) and Shopee inventory sync.

SKILLS

Programming: Python, Rust, Go, TypeScript/JavaScript, Java, C#, Bash

AI stack: LLM APIs (OpenAI, Gemini, Claude), agent runtimes, tool calling, Google ADK, RAG, MCP

Backend & data: FastAPI, gRPC/Protobuf, REST, SQL (PostgreSQL, MySQL), MongoDB, Redis, RabbitMQ

Frontend: React, Next.js, Tailwind, TypeScript

Ops & security: Docker, Kubernetes, GitHub Actions, OpenTelemetry, Grafana, pytest, SonarQube gates; per-service credentials, tenant isolation, host validation, CVE remediation

PROJECTS & ACHIEVEMENTS

- **1st Place**, CIMSO Hospitality ERP Hackathon (Mar 2025) – Built **SPLASH Golf Club** (React + ERP integration) with an AI voice chatbot for bookings.
- **3rd Place, Hack the Zodiac Hackathon (Apr 2024)** – Built NextThai and EcoMart, two AI consumer apps.

EDUCATION

Bachelor of Science (Information and Communication Technology)

Rangsit University | *Pathum Thani, Thailand* | *2022-2025* | ***GPA: 3.96/4*** | ***First Class Honours***

- Mentored classmates and foreign students in programming fundamentals.
