

SUMMARY

Backend Developer (Python / AI) with hands-on experience building scalable, production-ready backend systems using FastAPI, microservices, and modern data pipelines. Strong background in AI-driven applications including chatbots, computer vision, and multimodal systems, with experience deploying and optimizing real-world services.

WORK EXPERIENCES

Rangsit International College, Rangsit University

Teaching Assistant & Software Developer Intern August 2024 – December 2025

- Designed and developed backend services for multiple internal web systems, including a job fair platform and an attendance tracking system, using Python and FastAPI.
- Built a QR-based attendance system with location verification, improving accuracy and reducing manual tracking.
- Developed RESTful APIs and integrated authentication, MongoDB/SQL databases, and frontend components.
- Collaborated with faculty and development teams on full-stack applications using modern web technologies.

Brillar

Python Developer (Backend / AI) May 2025 – Current

- Developed high-performance backend services using Python and FastAPI for AI-driven applications, including LLM-based agent systems.
- Built and maintained large-scale data pipelines and web crawling services to extract, process, and store data efficiently.
- Integrated AI frameworks such as OpenAI Agents SDK and Google Agent Development Kit into production systems.
- Implemented logging, monitoring, and performance tracking to observe system latency, cost, and reliability in production environments.
- Optimized backend services using Dockerized deployments to ensure scalability and maintainability.
- Collaborated with cross-functional teams to troubleshoot complex system issues and deliver production-ready solutions.

TECHNICAL SKILLS & PROFICIENCIES

- Languages & Backend: Python, SQL, JavaScript, C#, FastAPI, Flask, Django, REST APIs, Async programming, Microservices
- AI / Data: Generative AI, LLMs, RAG (Retrieval-Augmented Generation), NLP, Computer Vision, PostgreSQL, MongoDB, Data Pipelines, Web Crawling
- DevOps & Tools: Docker, CI/CD, Logging & Monitoring, Git, GitHub, Postman

PROJECTS

Next Thai, Hack the Zodiac Hackathon Finalist

Your AI Assisted Travel Planner April 2024

- Built an AI travel assistant that generates personalized itineraries for Thailand.
- Implemented backend services to generate downloadable PDF travel plans.
- Integrated LLM-based recommendations using structured user inputs.

Eco-mart, Hack the Zodiac Hackathon 2nd Runner-up

Your AI Assisted Eco-friendly Shopping Advisor

April 2024

- Developed a shopping advisor as a finalist project for Hack the Zodiac Hackathon 2024.
- Built a system that searches Amazon, Lazada, and other e-commerce platforms to find products.
- Calculated eco-friendliness ratings and recommended the top 5 products based on user preferences and filters.
- Awarded 2nd Runner-Up at the hackathon for innovation and functionality.

SPLASH Golf Club | CIMSO Hospitality ERP Hackathon (1st Place)

A Modern System for Golf Clubs

March 2025

- Built a React-based frontend for a golf club management system integrated with CIMSO's ERP backend.
- Integrated frontend features with existing backend APIs to manage bookings, users, and reservations.
- Developed and integrated an AI-powered multilingual chatbot with voice interaction to support booking workflows.

Computer Vision Games

An project for RIC Openhouse

August 2025

- Developed interactive games using camera-based hand gesture detection (Fruit Ninja, drawing, Rock-Paper-Scissors).
- Built with Python, OpenCV, MediaPipe, and Pygame.
- Showcased at RIC Openhouse for demonstration and engagement.

EDUCATION

Rangsit University

Bachelor of Science in Information and Communication Technology

First Class Honors | GPA: 3.96 / 4.00

Coursework Completed; Degree Conferral: December 2026

Relevant Coursework: Data Structures, Database Systems, Machine Learning

CERTIFICATIONS

- Deep Learning Specialization — DeepLearning.AI
- Machine Learning — University of Washington
- Python for Everybody — University of Michigan
- Foundational C# — Microsoft
