HTIN LINN

Software Engineer (Rust / Python / Go)

Burmese | Bangkok, Thailand | +66 65 556 6035 | htinlinn.dev.03@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Software engineer working in Rust, Python and Go on backend services that run in production on Linux and Kubernetes. Currently building a Rust control plane that supervises one OS process per AI agent and mints its credentials. Comfortable in unfamiliar codebases (17 services, four languages); CI/CD, tests and observability are part of finishing the job.

Languages: English (IELTS 8.0), Burmese (Native), Thai (Basic), Japanese (JLPT N4)

EXPERIENCE

Software Engineer | *General Magick Industries (MagickMind)* | *Indonesia (Remote)* | *Full-time* | *Apr 2026 - Present*

- Built the agent supervisor in **Rust**: a control plane that mints per-agent credentials and runs one isolated OS process per agent, enforcing a **tenant boundary** on every request that acts on someone's behalf.
- Hardened the gateway's public chat route (Go): request-size cap, **host validation** on user-supplied URLs before the server fetches them, and structured tool calls in place of text parsing.
- Maintenance across three services: remediated **vendored CVEs** in container images (stripped pip from the uv-managed interpreter, pinned setuptools), namespaced Redis keys per service, and made message ingest **idempotent** so retries cannot duplicate records.
- Cut agent turn latency from **4s to 2.5s** and the reasoning service's fast path by **40%** with targeted caching, measured before and after.
- **Top committer** since joining on three production services; every change ships with tests through CI to Kubernetes. Contributor to Mindroid, the company's open-source Rust runtime.

Associate Fullstack Engineer | *Brillar (Atenxion)* | *Singapore (Remote)* | *Full-time* | *May 2025 - Apr 2026*

- Built a **Google ADK** multi-agent workflow platform, the CRM integration service (Zoho, SalesIQ, Chatwoot, Zendesk) and RAG retrieval over Crawl4AI and Docling.
- Owned two FastAPI services end to end: build and startup time down **30%**, OpenTelemetry and Grafana, pytest in pre-commit hooks.

EARLIER EXPERIENCE

Software Developer Intern | *Rangsit International College* | *Full-time Aug 2024 - May 2025, part-time to Dec 2025*

- Built a QR-based attendance system (Next.js/Express) saving **15 minutes** per class per staff.
- Led Express backend & React frontend for a job fair platform used by **300+ students and 100+ companies**.
- Built a Python/Django course recommendation system used by **100+ students**.

Freelance Software Developer | *Self Employed* | *Myanmar* | *Jan 2021 - Feb 2022*

- Built a Python/Bootstrap online ordering system for a local restaurant that cut average order time by **~3 minutes**, plus Shopee inventory-sync integrations for small businesses.

SKILLS

Programming: Rust, Python, Go, Bash/Shell, TypeScript, Java, C#

Systems & platform: Linux containers, Docker, Kubernetes, etcd service discovery, gRPC/Protobuf, Redis (clustered), PostgreSQL, MySQL, MongoDB, RabbitMQ, Centrifugo pub/sub

Security practice: per-service credentials, tenant isolation, input and host validation on user-supplied URLs, secrets kept out of repositories, dependency CVE remediation, SonarQube quality gates

CI/CD & testing: GitHub Actions, cargo test/clippy, pytest, multi-stage Docker builds, OpenTelemetry, Grafana

AI (secondary): LLM APIs, agent runtimes, Google ADK, RAG, MCP

PROJECTS & ACHIEVEMENTS

- **1st Place**, CIMSO Hospitality ERP Hackathon (Mar 2025) – Built **SPLASH Golf Club** (React + ERP integration) with an AI voice chatbot for bookings.
- **3rd Place, Hack the Zodiac Hackathon (Apr 2024)** – Built NextThai and EcoMart, two AI consumer apps.

EDUCATION

Bachelor of Science (Information and Communication Technology)

Rangsit University | *Pathum Thani, Thailand* | *2022-2025* | ***GPA: 3.96/4*** | ***First Class Honours***

- Mentored classmates and foreign students in programming fundamentals.
